

Bench Connections

Seats 1 and 2 are on the bench with 2 connectors. Seats 3 and 4 are on the bench with 1 connector.

Place the benches in seat 1-2-3-4 order, with the connectors toward the back.

Connect them together with the cables with rectangular connectors.

Connect them to the quizbox with the cables with the round connectors. The connectors are color coded to match the lights on the quizbox. Red goes to the left bench, yellow to the center, green to the right.

If the cables are mixed up, lights will light up in the wrong order on the quizbox, but the box and benches will not be damaged.
