

QUIZ EQUIPMENT

The black box with blue sides. Since 1981

For most church quiz programs, including CMA, Nazarenes, BIC, YFC, VCY and others.

Quiz boxes in the style shown are available for 2 teams of 4, 2 teams of 5 and 3 teams of 5. They will work with seat pads (including Quiz Time pads), benches, pedal switches and handheld switches.

Quizbox Operation

When someone jumps, the quizbox turns their light on, locks the other lights off and sounds a tone. The light will stay on (even if the person sits back down) until the quizmaster pushes the RESET button. Each seat has a corresponding switch on the quizbox to turn it off if it is not being used. The left team has red switches and lights, the center has yellow, and the right has green.

There is a switch to turn off the tone if the beep is not desired.

Timer Operation

The timer provides all the time intervals required for World Bible Quizzing plus a 60 second timer:

- 5 seconds for a quizzier to jump
- 30 seconds for the quizzier to answer
- 45 seconds for a time out
- 60 seconds for a time out

The quizmaster or timekeeper simply pushes the appropriate button to start the clock; the timer counts down to zero and beeps. The clock can be stopped and restarted if the quizmaster needs to "hold the time" for a decision. It can also be reset prior to the end of the timing interval. Operation is so simple and convenient that quizmasters usually prefer to run the whole quizbox by themselves.

Available Options

Scoreboard connector - to hook to a scoreboard so it can display who jumped first.

Remote Reset and Indicator Light - handy for the quizmaster if someone else is running the quizbox.

Note: If either option might be desired in the future, order the box with provisions now; save shipping and rework charges later.

SEAT PADS, HANDHELD SWITCHES, PEDAL SWITCHES

If you presently have benches or seat pads, they can probably be used with the quizbox. Quiz Time pads will plug in directly, as will benches wired like the pads. You could just order the quizbox alone. Other types of pads or benches may require re-wiring or a new connector.

If you need new equipment, the following types are available:

Bench Parts: I supply the switches, connectors, cables, wires and basic plans for wooden benches. You build them.

Clone Seat Pads: Clone Seat Pads are 3 x 6 inch vinyl pads with 2 switches inside. The pads have equivalent inner workings as Quiz-Time pads, but the outsides are different. They are color-coded for each team, and they do not have the rubbery bottom. They are made with permission from Quiz-Time.

Pedal Switch Seat Pads: Commercially available switches intended for foot operation but wired as seat pads. They are very durable and have a good click at the trigger point. They are individually wired and plug into small junction boxes located behind each team. Often used by Brethren in Christ Churches.

Handpads: Pedal switches as described above, but wired as push-to-jump for hand or foot operation. Quizzers are usually seated at a table with their handpads in front of them, and press it to signal in.

Handheld Switches: A switch held in the quizzer's hand and activated by pushing the button with the thumb, similar to what is used on "Jeopardy" on TV. These plug into small junction boxes like the pedal switches.

Miscellaneous

33' extension cables - to extend the distance between quizzers and the quizbox. Needed if quizzers will be up on a stage.
Half-bench interconnect cables - to connect bench halves together that, for transportation reasons, have been built for 2 or 3 quizzers each.

Handicapped adapter harness - used to temporarily substitute one handpad in place of a seatpad for a team with a quizzer who finds it difficult to jump.

Warranty: 2 years on the quizbox, 1 year on the pads and switches. Warranty does not cover failure due to abuse or user modifications.

Delivery: Call or e-mail to confirm delivery dates. (Lead times will vary greatly throughout the quizzing season.)

Payment: Make checks payable to Quiz Equipment, Inc. Include a street address for UPS - not a PO Box.

Price List

PRICE LIST 8/7/08*	2 teams of 4	2 teams of 5	3 teams of 5	Notes
Quizbox alone (no pads or switches)	\$230.00	\$250.00	\$320.00	Quizbox price includes shipping. Add pad or switch price to this.
Clone pads	\$110.00	\$120.00	\$180.00	Add \$15 shipping if not ordered with a quizbox.
Handheld switches, pedal switches	\$145.00	\$160.00	\$240.00	Add \$15 shipping if not ordered with a quizbox.
Bench parts	\$70.00	\$75.00	\$110.00	Bench plans are available free.

Quizboxes and pads may be purchased separately.

Option Prices 8/7/08*

Remote reset & indicator box	\$25.00	Handicapped adapter and pad	\$35.00	Half-bench interconnect cables	\$15.00 each
Scoreboard connector on quizbox	\$10.00	33' extension cables	\$35.00 each		

* Prices are subject to change. If this price list is more than one year old, please obtain the latest prices before ordering.

SCOREBOARD

QUESTION NUMBER	FIRST CHURCH	MIDWEST DISTRICT	FAITH COMMUNITY
AB	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5
20	-40	230	160

The scoreboard is made for major quiz events like finals or tournaments, where the audience greatly benefits by being informed on the progress of the quiz. The size (4' wide by 1.5' high by 4" deep) makes it easy to transport, yet big enough for audiences in large auditoriums. Electronic displays indicate who jumped first, the score for each team and the question number. Team names can be made on clear plastic sheets and inserted in front of the lit areas at the top of the scoreboard.

The scoreboard plugs into the control box (shown below) and into a quizbox equipped with the optional scoreboard connector. 45' cables are provided.

The score counts between -90 and +990 by tens; the question number counts between 1 and 99 by ones, and has an "A" and a "B" that can light up.

Price: Presently \$800.00 plus shipping. Price is subject to change.

Delivery: A few months after order is placed. Since these take so much time to build, only a few are made each year.

SCORE

Press **+10** to add 10 points

Press **-10** to subtract 10 points

Press **+10** and **-10** together to reset to zero

QUESTION

Press **+1** to add 1 to the question number

Press **-1** to subtract 1 from the question number

Press **+1** and **-1** together to reset to one

Flip switch up for **A**, down for **B**, center for off

Note: The 3 teams of 5 box now has lights on the back, so quizzers can also see who was first. It also has user-customizable features:

- Clock auto-start at 32 when a quizzer jumps. Allows 2 seconds to recognize quizzer, 30 seconds to answer.
- Seat pad polarity
- How the quizzer reset switch works - momentary or latching or double-click
- An available beeper chirp after 5 or 10 seconds that some programs need for the quizzer to begin speaking.

If you don't activate any of those modes, it will work just like the previous style quizbox.

These will be available just after Labor Day, 2008.
