

BARN QUIZBOX

3/2026

Originally built for someone who wanted to quiz with 25 people in a barn, the system consists of the control box (left hand box) and as many quizzer stations as you want. The quizzer stations are not daisy-chained, but connect via breakout cables, minimizing the number of connections. Breakout cables handle 4 quizzers, and have a 5th connector, available for a 5th quizzer or to connect to the next breakout cable. Enough breakout cables are provided to handle the number of quizzer stations you buy.

When the first person buzzes in, their light comes on, the control box beeps and everyone else is locked out. No timers are provided.

Quizzer station lights can be red (as shown), blue, green, or white.

How to order:

Call or email to place an order and I will send you a bill. Payment is required before the quizbox will ship. You can pay by check or Zelle, or PayPal if you cover their fee of about 3%.

Warranty:

- 1 year on the quizbox and quizzer switches. That does not include cosmetic damage, user modifications, or abuse.
- 90 days on the power supply. (No workmanship is involved on my part, and I can't control how you treat it.)
- If anything goes wrong, please call first. Maybe it can be fixed over the phone or by sending a part.

Quizbox Price List	3/11/126*
Control box	\$ 75.00
Quizzer Stations (each)	\$20.00
Replacement breakout cables	\$10.00
