

Knowledge Bowl Quizbox for South Carolina

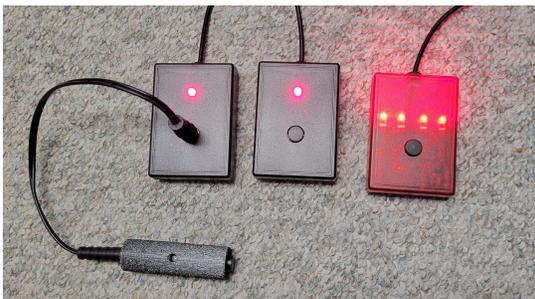

The quizbox was designed for the Knowledge Bowl competitions in South Carolina. It can handle up to 3 teams of 5 or more quizzers. When the first person buzzes in, their quizzer station will light up, the control box will beep, and everybody else will be locked out. The control box shows the order in which the teams buzzed in.

Push the Main Timer switch once to start the clock at 10 seconds; push it a second time to bump the time up to 30 seconds. The timer will freeze when someone buzzes in and will restart when the quizzer is reset. If the timer reaches zero, the box will beep.

Push the Timer Option switch at any time to start the 3 second timer, the time in which the quizzer needs to have begun speaking. The box will chirp when time runs out.

The back of the quizbox (quizzers side) has a timer display as well as team lights.

Quizzer stations can have a built-in switch or an RCA jack where a pendant switch can plug in.

Colored quizzer stations are available in red, green and blue. The whole front of the box shines when lit. It's great for an audience.

Black quizzer stations can have red, blue, green or white LEDs, and the quizbox will be made to match colors selected.
